

Swing Bed Program

*Helping patients transition
from hospital to home.*

If you or a family member are planning a surgery or are on the way to recovery, but need a little extra care... Parmer Medical Center is here for you.

What is a Swing Bed Program?

Our Swing Bed Program meets the needs of patients who are in the transition phase of illness or recovery. For those whose medical requirements cannot be met at home or in an acute care setting, our Swing Bed Program provides rehabilitation and recovery services based on your individual needs.

Who would benefit from the Swing Bed Program?

When a patient reaches the point in recovery where acute care hospitalization is no longer necessary, but they are not physically able to go home, our rehabilitative program is another step toward physical recovery.

Some examples include:

- Generalized weakness • Knee, hip and other joint replacements • Rehabilitation after vascular, abdominal and other surgical procedures • Recovery after a major accident • Rehabilitation after a stroke or heart attack
- IV medication therapy (Infection management)
- Wound care • Physical/Occupational and Speech therapy
